

UNIVERSAL MAINTENANCE OIL

READY TO USE FOR ALL OILED SURFACES

STRONG RESTORATIVE PROPERTIES

This Oil protects and regenerates all oiled surfaces* (finished either by the producer or end-user), regardless of the type of the finishing coat: standard solvent or waterbased.

Nonslip: tested in accordance with NF EN 13036-4.

INSTRUCTIONS FOR USE

- The **Universal Maintenance Oil** is applied to surfaces coated with oil which have lost their natural gloss (due to normal wear and tear, as a result of scratches...).
- A ready for use proportion: do not dilute, shake well before use.
- Apply to clean, dry and previously dusted surfaces. Oiled substrates should be cleaned and degreased on an ongoing basis with **Natural Soap**.
- Spray the preparation directly onto the surface, then wipe with a microfibre cloth.

IMPORTANT

If the surface shows signs of significant wear (damage to the wood), it is recommended to reimpregnate it with the original oil in order to avoid differences in colour.

*Perform a test for adhesion to the substrate beforehand.

Drying time: 20 min.

Coverage: 20 sqm/0,5 litre

Tools cleaning: carefully rinse the nozzle after every spraying, so that it does not become clogged.

Contains biocidal products: contains: MIXTURE OF: 5-CHLORO-2-METHYL- 4-ISOTHIAZOLIN-3-ONE; 2-METHYL- 2HISOTHIAZOL-3-ONE (3:1) and 1,2-BENZISOTHIAZOL-3(2H)-ONE. May produce an allergic reaction. Safety data sheet available on request. Keep out of reach of children. Use only outdoors or in a well-ventilated area. Dispose of contents / container to an approved landfill. Protect from frost. Do not apply at temperatures below 12°C.
